

2020

El catálogo 2020, está dividido por proveedores (marcas), en lugar de productos. Nuestra esponsorización en el proyecto **ECO Kids School** sigue adelante formando niños para un futuro mejor en el respeto de mares, ríos y las especies que habitan.

Como complemento de este proyecto comenzamos la difusión por redes sociales del movimiento "**CON UN SOLO GESTO**", tratando de concienciar en reducir el volumen en los envases. Todos nuestros proveedores están desarrollando nuevos embalajes más ecológicos. Seguimos promoviendo embalajes mas sostenibles (reduciendo la cantidad de plástico), los **ECO PACKS**.

En nuestros catálogos solo ofrecemos productos de calidad.

*The 2020 catalog is divided by suppliers (brands), instead of products. Our sponsorship in the **ECO Kids School** project continues to train children for a better future in respect of seas, rivers and the species they inhabit.*

*As a complement to this project we began the dissemination through social networks of the movement "**WITH A SINGLE GESTURE**", trying to raise awareness in reducing the volume in packaging. All our suppliers are developing new greener packaging. We continue to promote more sustainable packaging (reducing the amount of plastic), the **ECO PACKS**.*

In our catalogs we only offer high quality products.

Le catalogue 2020 est divisé par fournisseurs (marques), plutôt que par produits. Notre sponsoirisation dans le cadre du projet **ECO Kids School** continue de former les enfants pour un avenir meilleur en ce qui concerne les mers rivières et les espèces qu'ils habitent.

En complément de ce projet, nous avons commencé la diffusion à travers les réseaux sociaux du mouvement "**AVEC UNE SEUL GESTE**", en essayant de sensibiliser à la réduction du volume dans l'emballage. Tous nos fournisseurs développent de nouveaux emballages plus écologiques. Nous continuons à promouvoir des emballages plus durables (en réduisant la quantité de plastique), les **ECO PACKS**.

Dans nos catalogues, nous ne proposons que des produits de qualité.

MAXFORCE II

Ajustable. Correas de nylon de alta resistencia con cosidos cruzados para una durabilidad extrema. Parte posterior de malla transpirable con bio-espumas en las bandas para distribuir la carga cómodamente. Mosquetones de acero inoxidable para una buena sujeción con las orejeras del carrete. Trabillas en acero inoxidable para ajustar cómodamente las correas.

Adjustable to all sizes. High strength nylon straps with cross stitching for extreme durability. Breathable mesh back in the bands to distribute the load comfortably. Stainless steel handles for good attachment with reel flanges. Stainless steel sleeves to comfortably adjust straps.

Entièrement ajustable. Sangles en nylon haute résistance avec coutures croisées pour une durabilité extrême. Mesh respirant dans les bandes pour répartir la charge confortablement. Poignées en acier inoxydable pour une bonne fixation avec les brides de la bobine. Manches en acier inoxydable pour ajuster confortablement les sangles.

SPIN STRAP

Usado con el chaleco AFTCO MAXFORCE II nos ayudará en los combates con equipos de spinning. Conectando los aros metálicos a los mosquetones de nuestro arnés, obtendremos un equipo perfecto para los combates más extremos con equipos de spinning. Pasar la cinta alrededor de nuestra caña por encima del carrete y luego fijar los anillos metálicos a nuestro chaleco.

Use With A Shoulder Harness To Help Maximize Leverage When Fighting Bigger Fish With Spinning Tackle. By connecting the metal rings to the carabiners of our harness, we will obtain a perfect equipment for the most extreme combats with spinning equipment. Pass the ribbon around our reed above the reel and then attach the metal rings to our vest.

La sangle Spin Straps de chez Aftco a été spécialement développée afin de pouvoir adapter un harnais sur une canne spinning. Cela vous sera d'une grande utilité si vous pêchez de gros thons au lancer entres autres. Cette sangle Aftco s'adapte à merveille avec le harnais Aftco Maxforce II et permet lors d'un combat musclé de pomper le poisson de manière optimale.

SALABRE PARA CEBO VIVO / BAIT NETS

Malla de poliéster tejida, sin nudos y apta para cualquier tipo de cebo vivo. Diseñada para una alta durabilidad para recoger cebos vivos delicados.

Woven polyester netting - a commercial grade, knotless, bait-friendly mesh, designed to last for many seasons of heavy use - are the perfect live bait net choice for scooping delicate baits.

Le filet tissé en polyester - un maillage de qualité commerciale sans nœuds, conçu pour durer de nombreuses saisons d'utilisation intensive - est le choix idéal pour ramasser les appâts délicats.

PINZAS MULTIUSOS / GOLDFINGER™ MULTI-PURPOSE RELEASE CLIPS / PINCES POLYVALENT

PINZA PARA TANGÓN / GOLDFINGER OUTRIGGER / PINCE POUR TANGON

Ref. **OC1B**

Selector de tensión de disparo muy preciso con 12 posiciones de ajuste gancho de la línea en nitrato de titanio color oro.

Unique And Precise Tension Adjustment Slider, 12 Tension Settings, Oversized, Polished, Gold Titanium-Nitride Coated Bail. Goldfinger Outrigger release clips should be attached directly to the outrigger halyard without the use of swivels.

La presión de liberación de la línea es très précise et simple avec 12 possibilités de réglage de la tension selon la position du curseur. Les pinces à tangons Goldfinger Outrigger se fixent directement au tangon sans émerillon.

18'90

PINZA PARA PROFUNDIZADOR / GOLDFINGER DOWNRIGGER / PINCES POUR DOWNRIGGER

Ref. **DC1B**

La parte del ajuste de tensión de la pinza se debe colocar en la parte de abajo. Para fijar la pinza a la línea bastará con un pequeño remache intercalado en la parte central de la pinza.

This is best accomplished by threading one side of the clip onto the cable, then placing a crimp on the cable before passing it through the remaining half of the clip.

Doivent être attachés directement au câble au-dessus de la bille du downrigger. Pour ce faire, enflez un côté du clip sur le câble, puis placez un sertissage sur le câble avant de le passer dans la moitié restante du clip.

15'30

PINZAS / RELEASE CLIPS / PINCES DÉCLENCHÉES

Rodamiento inoxidable con rodillo interno de AFLON. De esta manera reducimos el ruido y el rozamiento de la línea. En la pinza llevan incorporado un regulador de disparo, este lo podremos poner a la tensión deseada.

Mettant en oeuvre un roulement AFTCO. Ceci réduit la friction et les bruits. Le nylon passe par une poulie AFTCO ce qui supprime tout risque d'abrasion et d'écrasement. Réglage précis de l'intensité de serrage pour une ouverture plus facile.

Roller-Troller®
The line saws back and forth around a thin ball, under pressure and at a severe angle, to endure punishing friction and fraying.

The roller turns smoothly along with the line to eliminate friction and wear. The bigger radius of the roller also relieves line strain.

Ordinary Clip

Stainless Steel Roller, with AFLON™ bearing, never roughens or "grooves."

Improved Micro-Tension Adjustment turns easily, even with slippery fingers, for precise, graduated tension settings. Once set to the desired tension, the latching system will repeatedly release at exactly the same pull. The improved "adjuster" can't disassemble.

Consejo AFTCO: Para un buen mantenimiento de nuestras pinzas se recomienda una buena lubricación de las partes móviles así como enjuagar con agua dulce después de cada uso.

Clip Tip: For maximum performance and "slickness" when contacting trolling lines, AFTCO clips should all be lubricated regularly with silicone spray. Clips should also be routinely inspected for missing or damaged parts and loose hardware caused by boat vibration.

38

LAZO DE COLA / TAILER / LASSO - CATCH AND RELEASE

Muy útiles si queremos medir al pez y luego liberarlo. Es mucho más eficaz que un gancho de boca y no daña en absoluto al pez. Amplio lazo con un cable de acero que se desliza fácilmente sobre la cola del pez y con un rápido tirón hacia arriba el lazo se cierra. Puede levantar peces de hasta 100 Lbs.

AFTCO "Tailers" help you bring a boated fish under control quickly and safely, are the ideal way to control fish while you measure them for legal size, and can be a big help in lifting heavy fish into the boat. When used on a fish that is to be released and they minimize injury to the fish. Featuring a wide loop of springy stainless steel aircraft cable.

Très utile si l'on veut mesurer le poisson puis le relâcher. Il est beaucoup plus efficace qu'un boucch crochet n'abîme pas du tout le poisson. Large boucle avec un câble en acier glisse facilement sur la queue du poisson et avec une traction rapide la boucle se ferme. Peut soulever des poissons jusqu'à 100 livres. Poignée antidérapante robuste.

El lazo de cola está pensado para una vez abierto no volver a cerrarlo.
The Tailer is designed so that once opened it will not close again.
La boucle de queue est conçue de telle sorte qu'une fois ouverte, elle ne se referme plus.

Resistance to saltwater corrosion

639 GRAMS ONLY

Gold anodized finish

GANCHO VOLANTE (DESMONTABLE) / TAPER-TIP FLYING GAFFS / GAFFE VOLANTE

El gancho se introduce en una inserción que tiene el mango y con una pequeña línea de nylon lo fijamos a un pequeño resorte que lleva en el exterior. Cuando gancheamos el pez y al efectuar un tirón la línea se rompe y recuperamos el mango, quedando el gancho clavado al pez y unido por un cabo de seguridad. **El Mango, sin el gancho, es flotante.**

The hook seats in a tough plastic insert fitted into the gaff tip, and is held in place by a length of 20-lb. test line tied to a steel post affixed to the shaft. When a fish is gaffed, this line snaps, providing a clean and immediate release. A machined aluminum gimbal at the butt of the shaft secures the attachment rope; and along with the plastic insert in the tip, prevents water from seeping into the shaft. If dropped overboard, **the gaff handle (minus hook) will float!**

Un évidement (encoche spéciale) a été conçu en position haute pour recevoir le crochet de gaffe adapté (non fourni d'origine avec le manche, achat complémentaire). A noter que le manche est flottant ce qui permet de le récupérer s'il advenait qu'il tombe (seul bien entendu) à l'eau. Solide croc inox hyper renforcé avec une pointe retravaillée pour un profil plus performant optimisant le gaffage des plus gros spécimens. **La poignée de la gaffe (crochet moins) flottera!**

RATTLE SNACK FRESHWATER

7

Natación única que imita a un cebo herido, junto con un sonajero. Señuelo ondulante en la caída de recuperación media. Para curricán y spinning.

Unique swimming action that imitates an injured baitfish, coupled with a rattle. This lure flutters on the drop and retrieve to encourage more strikes. For trolling and casting.

Action de nage unique qui imite un poisson-appât blessé, associé à un hochet. Leurre ondulant dans la chute moyenne de récupération. Pour la traîne et le casting.

Dos medidas / Two sizes / Deux tailles: 7 g - 55 mm / 14 g - 70 mm

Todas las medidas disponibles en 5 colores.

All sizes available in 5 great colours.

Toutes les tailles disponibles en 5 couleurs.

MINIMUM ORDER PER SIZE AND COLOR: 5 UNITS

ENTICERS FRESHWATER

7

Cucharilla ondulante con una acción de "aleteo" particular debido a su forma característica. Ideal para ríos y lagos. Todas las medidas disponibles en 4 colores.

"Fluttering" action created by the spoon shape makes them particularly attractive. For trolling and casting. Ideal for rivers, lakes. All sizes Available in 4 great colours.

L'action de «flottement» créée par la forme de cuillère les rend particulièrement attrayants. Pour la pêche à la traîne et le lancer. Idéal pour les rivières, les lacs. Toutes les tailles disponibles en 4 couleurs.

Dos medidas / Two sizes / Deux tailles: 7 g - 45 mm / 12 g - 60 mm

NEEDLE NOSE

Diseñado para lanzamientos largos y recuperaciones rápidas. Con la caña muy alta y una recuperación lenta se conseguirá un efecto tipo "paseante". Ideal para días calmados.

Designed for long casts and fast retrieves. Slow retrieve with a high rod produces a strong side-to-side nose action. Ideal in calmer conditions.

Conçu pour les lancers longs et les récupérations rapides. La récupération lente avec une canne à pêche haute produit une forte action du nez d'un côté à l'autre. Idéal dans des conditions plus calmes.

ECOLOGIC PACKAGING

En el mundo de la pesca una gran parte de productos se envasan y se muestran en las tiendas en envase de plástico. Lamentablemente se tiran al mar o al río, tardando mas de 500 años en desaparecer, perjudicando gravemente nuestro único planeta.

A medida que sea posible iremos cambiando plástico por cartón, sin que ello perjudique la exposición de los productos en la tienda tal y como se ha diseñado el proyecto, ya que en cada envase de por ejemplo 12 unidades, habrá una en plástico como hasta la fecha y 11 en cartón, de modo que en su exposición siempre habrá el producto visible para el cliente.

Estamos dialogando con nuestros proveedores sobre este proyecto para intentar que se unan a nosotros. Deseamos firmemente ser uno de los primeros en contribuir a eliminar plásticos en los embalajes.

In the world of fishing a large part of products are packaged and displayed in stores in plastic packaging. That means tens of millions of containers, which not all return to the recycling process, many unfortunately are thrown into the sea or the river, taking more than 500 years to disappear, severely damaging our only planet.

As far as possible we will be changing plastic cardboard, without affecting the exposure of the products in the store as the project has been designed, since in each container of for example 12 units, there will be one in plastic as date and 11 in cardboard, so that in his exhibition there will always be the product visible to the client.

We are talking with our suppliers about this project to try to join with us. We firmly wish to be one of the first to contribute to eliminate plastics in packaging.

Dans le monde de la pêche, une grande partie des produits sont emballés et présentés dans des magasins dans des emballages en plastique.

Cela signifie que des dizaines de millions de conteneurs ne sont pas tous recyclés. Malheureusement, beaucoup d'entre eux sont jetés à la mer ou à la rivière et mettent plus de 500 ans à disparaître, endommageant gravement notre seule planète.

Dans la mesure du possible, nous remplacerons le carton en plastique sans affecter l'exposition des produits dans le magasin tel que le projet a été conçu, car dans chaque conteneur de par exemple 12 unités, il y en aura un en plastique comme toujours et 11 en carton, de sorte que dans son exposition, le produit sera toujours visible pour le client.

Objetivo principal: 11 cajitas de cartón + 1 de plástico
+ 1 de cartón con un regalo GRATUITO (11 + 1 + 1).

Main objective: 11 cardboard boxes + 1 plastic box
+ 1 cardboard box with a FREE gift (11 + 1 + 1).

Objectif principal: 11 boîtes en carton + 1 boîte en plastique
+ 1 boîte en carton avec un cadeau GRATUIT (11 + 1 + 1).

BOX:
11+1+1 GIFT.

50 / 150 PAPER BAGS

BULK PACKAGING

Sugerimos adquirir algunos productos en "bulk" (a granel) al objeto de poder suministrar a unos clientes cantidades distintas y contribuir en la reducción de envases de plástico.
We suggest acquiring some bulk products in order to supply different quantities to customers and contribute to the reduction of plastic containers.

Nous vous proposons d'acquérir certains produits en vrac (en vrac) afin de fournir différentes quantités aux clients et contribuer à la réduction des contenants en plastique.

JIGGING HOOK ASSIST

Single Hook Hand Tied Available in Hard Mono Core or Soft Wire Core. With perfect quality of jigging hook assist, Anglers will gain confidence in fish fighting. Opportunity seldom knocks twice.

Jigging hook assist with hard mono core could reduce the chance of entangle hook to the leader during retrieve. Jigging hook assist with soft wire core could prevent the cut of sharp object during the fish strike.

The strong hook yet small wire diameter will increase the strike rate.

RELIX PERFECT FLUOROCARBON 100% FLUOROCARBON

Una línea de hundimiento rápido, invisible bajo el agua. Es 4x más resistente a la abrasión que el monofilamento. Tiene una superficie muy lisa, resistente y suave, lo que hace fácil atar nudos o empatillar anzuelos.

Fast sinking line that is invisible underwater. It is 4x more abrasion resistant than common Nylon monofilament. It has a very smooth surface, high strength and is softer than common Fluorocarbon lines which also makes it easy to tie knots.

Ligne de coulée rapide invisible sous l'eau. Il est 4 fois plus résistant à l'abrasion que le monofilament. Il présente une surface très lisse, une résistance élevée et est plus doux que les lignes de fluorocarbone ordinaires, ce qui facilite également les nœuds.

HOLLOW SUPER BRAID 16

Un trenzado de 16 hebras hueco que permite que el monofilamento sea empalmado dentro de él y quede una conexión directa con el leader.

Design allows monofilament to be spliced into the braid for the strongest possible main line to leader connection.

Une tresse creuse à 16 brins qui permet au monofilament d'être épissé dans la tresse et constitue une connexion directe avec le leader.

RELIX WIND ON LEADER FLUOROCARBON

Fluorocarbono Relix unido al trenzado, sin nudo, haciéndolo un bajo mucho más resistente. De esta forma se puede entrar en el carrete toda la línea hasta el final del anzuelo.

Relix's high strength fluorocarbon line has been combined with low stretch PE Fiber to create the strongest. The wind-on system improves bait presentation, eliminates the need for conventional long leaders and provides safer handling and releasing of fish at the boat.

Le bas de ligne s'attache boucle dans boucle au corps de ligne, pour le remonter totalement dans la bobine de votre moulinet. Il sera ainsi bien plus facile de manipuler le poisson en proximité du bateau et ensuite le décrocher.

HALCO FISH RING PLIERS

A diferencia de un alicate común con el abre anillas en el pico, estas abren la anilla en la mitad del alicate. Aplicables para cualquier anilla del Mercado desde el tamaño más pequeño hasta 95 kg. Construidas en acero.

That don't stretch the ring when applying it to the lure or when changing out a treble. They are used from our tiny #2 fish rings right through to the large #7xx (95kg) fish rings.

Contrairement à une pince commune avec les anneaux ouverts dans le pic, ceux-ci ouvrent l'anneau au milieu de la pince. Applicable pour n'importe quel anneau de marché de la plus petite taille aux grandes tailles jusqu'à 95 kilogrammes. Construit en acier.

TWISTY CHROME

Los extremos curvos del famoso Twisty Chrome crean una acción tentadora como ningún otro señuelo metálico. Para grandes pelágicos como el bonito y el atún y truchas en los ríos. **Muy efectivo para la anjova o "tallahams".**

The curved ends of the famous Twisty Chrome create an enticing action like no other metal lure. Ideal for Bluefish.

Les extrémités courbées du célèbre Twisty Chrome créent une action tentante comme aucun autre leurre en métal. Très efficace pour le Tassergal.

*When making a purchase of 10 units (two packs of 5) of some Halco products. **A 4 PACK OF JIG SKINZ PACKAGE WILL BE DELIVERED FREE OF CHARGE WITHOUT COMMITMENT** OF A COLOR DETERMINED DURING THE YEAR 2019.*

Lorsque vous achetez 10 unités (deux paquets de 5) de quelques produits du Halco. **UN PAQUET DE 4 JIG SKINZ SERA LIVRÉ GRATUITEMENT SANS ENGAGEMENT** DE COULEUR DÉTERMINÉE LORS DE L'AN 2019.

POLTERGEIST

Para spinning en zonas donde hay espacio limitado y requiere que el señuelo llegue lo más profundo en el mínimo tiempo posible. Ideal para el curricán en zonas sobre una barra de roca. Se desplazará por la parte inferior de la barra, golpeándolo con regularidad, pero cuando llega al otro lado (donde hay más profundidad) trata de hundirse inmediatamente.

Ideal for casting to structures where there is limited room and you require the lure to get as deep as possible and as quickly as possible. When trolling the lure dives deep quickly and travels along at around 5 metres with a shuffling action.

Un leurre "plongeur" idéal pour la pêche au lancer dans les zones où l'espace est limité et exige que le leurre atteigne le plus profond possible dans les plus brefs délais. Aussi pour la pêche à la traîne dans les zones sur un bar rock ou zone peu profonde. Il se déplace au bas de la barre, en frappant régulièrement, mais quand il atteint l'autre côté (où il y a plus de profondeur), il essaie de couler immédiatement.

C-GAR FLOATING

El Halco C-Gar es un stick bait, diseñado para su uso en la superficie para especies **como la anjova, el palometón o el atún**. El diseño del morro y su fina parte trasera aseguran un lance de larga distancia. Anzuelos reforzados y anillas triples para grandes peces.

The Halco C-Gar is a weighted stick bait, designed for use on the surface for species such as Bluefish, Leerfish, Tuna and others predatory fish. The unique nose and weighting ensures long casting ability. Featuring heavy duty Mustad trebles and Halco's famously strong fish rings for the ultimate lure to hook connection.
