

CATALOGUE 2020-2021

GLOBAL ROUND UP

It's been a year like no other - akin to taking a small boat out into a big cyclone. At the time of writing we aren't out the other side yet but I'm sure we can see calmer water ahead.

It's been a great time to look inwards and consider how lucky we really are. I'm sure it's made us all appreciate the simple pleasures in life like family, friends and fishing. We were off the water for a while and we didn't see a lot of friends, but slowly that is changing for the better.

It hasn't stopped me and the team beavering away on new products and colours. The Slidog 105 and the 8" Inhale Tail got a lot of focus and the new colours offered this year are sensational.

Once you get the opportunity to give them a fish, I'm confident you'll be impressed. Not just by their fish catching ability, but also the Halco durability at a fair price.

Looking forward to seeing you on the other side of the storm. Keep safe and well.

Ben Patrick
Managing Director and owner

LASER PRO 190-120™

The latest in lure technology incorporating strength, durability and fish catching ability. The outer body has extra secure hook anchoring and towing points that are built in as an integral part of the lure body. Halco's Bulletproof bib securing system provides added strength and ensures faultless swimming performance at high and low speeds. Halco Laser Pro lures are precision built for maximum fish catching ability.

LASER PROS ARE NOT JUST ABOUT BLUEWATER, BARRAMUNDI LOVE THEM TOO - CHECK THIS OUT.

UNIQUE

Halco Bulletproof Bibs are pretty tough (polycarbonate's used in bullet proof glass). Combined with our unique, glueless locking method, these bibs stay put. Glueing bibs is a quick fix we leave to our competitors - over time glue solvents can weaken plastic till it snaps. These lures work and keep working, with a bib that's locked in tight for a good fight. Bibs not sold separately.

The Laser Pro 120MT is a modern take on a classic lure design. The latest MT lure version features multiple trebles making it a Mouth Trap for unsuspecting barramundi, mangrove jack and other vicious ambush predators.

The lure is designed for precision casting applications featuring sticky sharp, fine gauge forged hooks for great hook sets while retaining superior holding ability.

Available in clear and fully painted finishes, the Laser Pro 120MT is taking you back to the future.

TECHNOLOGY

4C PRINTING

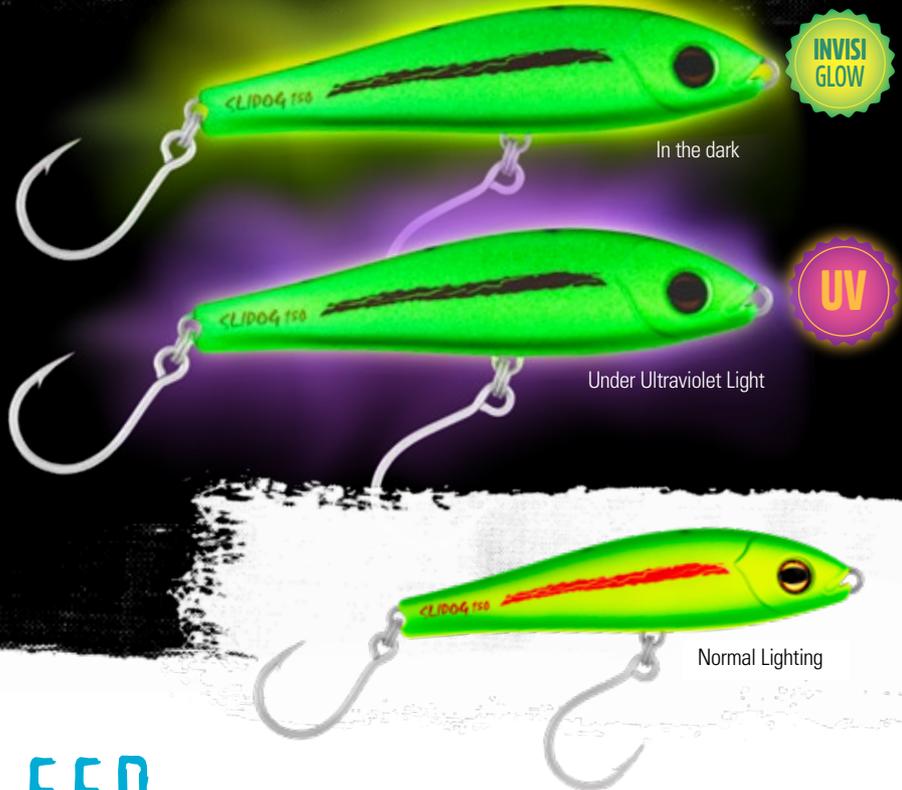

Our new 4C printing process allows much more realistic lure appearances.

INVISIGLO & UV

This year we are excited to bring you a new feature to a number of our popular colours!

Finally, after years of jumping hurdles we have finally developed the INVISIGLO process that will not affect external daytime appearance of the lure colour!

DESIGNED TO BLEED

The more they chew the better they look! Our designed to bleed concept means our vacuum metalised (chrome) colours have a red layer underneath, imitating an injured baitfish as the wear and tear naturally takes place (from all the fish you'll catch!).

The Halco C-Gar is a weighted stick bait, designed for use on the surface for species such as Australian Salmon, Tailor and Queenfish or alternatively sub surface for all tuna, mackerel and other predatory fish.

The lure action is less splashy than a popper however the unique nose and weighting ensures long casting ability with enough surface action to entice a strike from the wary fish looking for an easy meal.

Featuring heavy duty Mustad trebles and Halco's famously strong fish rings for the ultimate lure to hook connection, the C-Gar is built like all other Halco products, to catch fish day in, day out without fuss and bother.

The Skim Stick is a totally unique and innovative design concept for blue water anglers.

A hybrid between stick bait and skittering popper, the Skim Stick imitates a long, narrow profiled baitfish fleeing on the surface from any hungry predators in the area.

It is intended for casting and slow trolling situations and features Halco's new clear polymer technology with internal holographics and scales in some colours while other more traditional finishes are also available in the range.

For the first time, Decoy 5/0 inline single hooks come as standard fare to make the handling active fish less of a risky proposition while giving superior hook setting and holding ability.

Halco is a multi-generational family operated lure manufacturer, so it's hardly surprising that they design and build products along family lines as well. The Max family of bibless minnows share the same award winning DNA to display consistent qualities across the range. Each member is designed to troll perfectly at speeds up to 14-20Kts, alternatively cast and retrieve subsurface or from the depths for instant action. Attributes they share include Halco's legendary toughness and iconic Fish Rings while the chrome variants share the ingenious "designed to bleed" coatings. Halco's Max 130 and 110 feature Mustad trebles while the Max 190 and 220 come fully loaded with Mustad in-line singles so you can fight the fish of a lifetime with confidence. The Max family grows larger and more diverse with each generation, so next time you're browsing in your favourite tackle store, stop by and meet the family.

ROOSTA POPPER™

The Halco Roosta is on the cutting edge of modern popper design with significant new innovations that improve the action and stability of this spectacular surface lure. The head design which is wide at the top transfers to a widened tail end. This unique design creates a popper that is ideal for a straight fast retrieve or a stop and start bloop with exceptional splash. The design minimises cartwheeling and the rattle ensures significant noise coupled with the water spraying action.

HAMMA™

HAMMA 123

HAMMA 105

HAMMA 85

The Halco Hamma is the new frontier of lure technology. It is a clear-bodied, controlled rise casting lure supplied with multiple, easily changeable bibs of varying depths. It gives maximum flexibility in one easy package. Hamma is destined to nail its competition and turn the lure fishing world on its head. The Hamma was designed from the ground up, to tackle some of the world's toughest and most iconic sportfish like Barramundi, Black Bass, Mangrove Jack, Tigerfish and Tarpon.

It has an incredibly realistic baitfish profile, and also features a specially designed weight transfer system for great casting ability, super sharp and strong Mustad trebles for maximum holding potential when using today's modern braided line technology, and Halco's famous heavy duty fish rings. In the water the Hamma has marvellously enticing, tight swimming action with a subtle phase shift mid-cycle that can be used to easily mimic a wounded bait fish.

Reflecta tape is brightly coloured, adhesive-backed holographic film.

TOOLS & CLOTHING

Halco Fish Ring Pliers

At Halco we put millions of fish rings on its products every year. It goes without saying we need easy to use pliers, that don't stretch the ring when applying it to the lure or when changing out a treble.

This truly unique and patented design has been developed and refined by Halco Tackle to give optimal performance and long lasting service as they do here in the factory.

They are used in the factory for all our products, from our tiny #2 fish rings right through to the large #7xx (95kg) fish rings. The fish ring pliers are also fine to use on any other commercially available split rings in the market.

Made out of hardened tool steel, the useful life of the product outdoors will be extended by rinsing in fresh water if it has been immersed in salt water and applying a light coating of spray oil to the steel parts.

For information on how these pliers work visit the "Halco Tackle" YouTube Channel for a short clip on how they work so well.

TILSAN BIG BARRA

The Big Barra is the new dimension in timber lures. This suits trolling deep for big predators as well as being a perfectly weighted cast and retrieve lure. With an action that starts with the smallest twitch of the rod tip and near neutral buoyancy, the Big Barra is the ideal lure to twitch around snags and structure when a large profile lure is required.

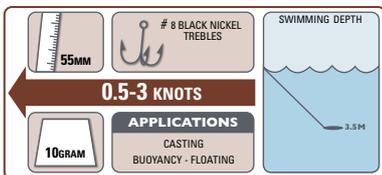

TILSAN BARRA

The Tilsan Barra is the most versatile timber lure ever made. From dead slow twitch retrieve in the snags, to a super fast troll out wide, the Tilsan Barra Lure can handle it all. With its centreline design stainless steel frame and Tilsan's unsurpassed quality, the Tilsan Barra is a must-have in every serious fisherman's tackle box. If you're after a lure that does the lot - you can't go past the Tilsan Barra.

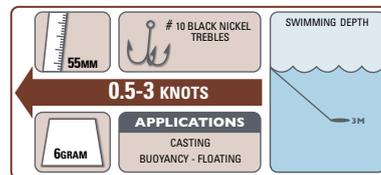

TILSAN BASS

The Tilsan Bass is one of the fastest diving lures around. Reaching a depth of 3.5metres in an average cast, makes it an excellent lure for fishing deep-water snags and fast drop-offs. With its centreline design framing system, you are assured of landing that deep water monster.

TILSAN MINNOW

The Tilsan Minnow was one of the first Tilsan lures on the market. Its success as a high performance fish catching tool has enabled Tilsan to produce the world's greatest timber fishing lures. With a natural baitfish profile and near lifelike decoration, the Tilsan Minnow is at the forefront of lure technology in the world today. Built around Tilsan's famous centreline design framing system, it's an incredibly strong and versatile lure for its size.
