PELAGIC **POLARIZED™**

BUILT FOR FISHING

BUILT FOR FISHING

Since 2002, PELAGIC has been devoted to providing the best in technical apparel, high-performance polarized optics, unique lifestyle wear, and ocean-inspired gear & accessories to passionate fishermen around the globe. Working with the best-of-the-best professional captains, mates, deckhands, and watermen of the world, we continue to tirelessly research, develop, & perfect our craft to produce the ultimate fishing products that perform with you on the water when it counts the most.

PELAGIC POLARIZED™ represents the highest evolution in marine-grade polarized optics. Designed to give anglers an acute edge when fishing in any ocean or weather conditions, our multi-layer polarization system delivers the most-optically correct and visually accurate lens on the market today. Purpose-built for life on the water, Pelagic Polarized Sunglasses offer the complete package, combining the latest optical technologies with a lightweight & comfortable fit to create the ultimate visual advantage.

Specifically built for fishing, PELAGIC POLARIZED™ is the #1 choice in performance eyewear for serious fishermen. Our professional-grade Polarized Mineral Glass (PMC™) and top-of-the-line polycarbonate (XP-700™) lens options have been rigorously tested under the harshest conditions by the planet's premier sport boat captains and industry professionals to consistently outperform the competition.

"In my business, sunglasses are as important as any piece of equipment on the boat. The quality of the lens and the durable frame make PELAGIC POLARIZED the best option available."

- PELAGIC Pro Team Captain Brad Philipps – World Record Holder – Most Lifetime Billfish Released – over 38,000 and counting!

BUILT FOR FISHING

PELAGIC POLARIZED

FEATURES

ZERO GLARE POLARIZATION
Highest grade 7-layer(glass) and 5-layer(poly) polarization engineered specifically to the needs of offshore fishing

GRIP-TEX™
Grip-tex™ located on the nose pad as well as the arm provide anti-slip technology to keep your sunglasses firmly in place

FLEX HINGE
Heavy duty 2-way flex hinge accommodates any head size and stands up to the rigors of heavy everyday usage on sea or land

HIGH STRENGTH POLYURETHANE FRAMES
High tensile urethane provides extra strength and added durability

TUFF LENS™
Pelagic lenses with our proprietary tuff-lens™ coating are extremely scratch resistant as well as meeting or exceeding stringent ANSI shatter ratings

PERFORMANCE COATINGS
Pelagic anti-reflective and oleophobic lens coatings eliminates distracting bounceback reflections and oleophobic repels water, dirt and oils from gathering on lens

PROPRIETARY LENS TECHNOLOGIES

Purpose-built for life on the water, Pelagic Polarized is the #1 choice in performance eyewear for serious fishermen around the globe. Featuring our top-of-the-line, professional-grade Polarized Mineral Glass, as well as our high-tech & lightweight poly lens option , these high-performance optics have been rigorously tested under the harshest conditions by the industry's most-iconic sport boat captains, mates, and legends to consistently outperform the competition.

OLEOPHOBIC

Rain, Dirt, Oil and Dust Resistant - Prevents the elements from distorting your vision, and allows for easier lens cleaning.

ANTI-REFLECTIVE

Absorbs light and prevents it from bouncing off the back of the lens into your eye, eliminating distracting bounce-back reflections.

ANTI-SCRATCH

This hardcoat layer is designed to further protect the lens from abuse and scratching.

UV PROTECTION

100% UV Absorption - Blue Light Protection - Sun Protection Factor (SPF) superior to 140

POLARIZED MINERAL GLASS

Pelagic lenses represent the highest evolution in marine-grade polarized optics. Offering incredible HD Vision via layers of naturally occurring minerals and rare earth elements, our lenses were specifically developed for “life on the water” where harsh, salty, and ever-changing conditions often persist for days on end.

BLUE MIRROR

Purposely designed for fishing, blue mirror is a great all-around lens option. Offers a natural contrast in most light settings to provide the eye with ideal color and depth perception in a wide variety of light conditions.

GREY

A great all-around lens option, offering a natural contrast in most light settings to provide the eye with true color and depth perception.

GREEN MIRROR

Ideal for flat visibilty conditions and inshore/flats fishing, the amber base with mirror finish enhances contrast to pinpoint subtle sub-surface color variations.

SUNRISE

Provides an optimized level of contrast while reducing glare during medium to bright light conditions on or off the water.

GOLD

Provides and optimizes the use of low level light. Perfect for early mornings, late evenings and any overcast situation where light is less than ideal.

PERSONAL PREFERENCE:

While we have laid out suggested uses for each lens, note that each person responds differently to light, as well as color & depth perception. For that reason, we recommend that anglers select the best lens that works appropriately for YOU.

OWNING MULTIPLE PAIRS:

Unexpected light and weather conditions present themselves daily on and around the water; for that reason, owning multiple pairs of sunglasses with varying lens options is of utmost importance.
